

In the Specification

Please amend the first full paragraph of page 7 as follows:

61
Bearing 550 can be made of any material of suitable strength to receive and secure end of antisway bar (not shown). ~~Other preferred~~ Preferably, bearing 550 is made from bronze, polyurethane, or composite materials. More preferably, bearing 550 is made from ultra-high molecular weight polyethylene. Bearing 550 can also be mounted and secured within housing 530 without fastening by using housing 530 and plates 501, 502 to keep bearing 550 from movement within mounting arrangement 390. Other types of bearings used are when using a ball or a taper bearing.
